ARKAS Line

24 November 2026

Dear Valued Customer,

We would like to inform you that Arkas Line USA Terminal Handling Charges (THC) Tariff applicable to US East Cost Ports will be revised effective 1 January 2027.

Since the launch of our USX service, the applicable THC levels have remained unchanged and any increase has already been absorbed by Arkas Line and not reflected to the sea freights.

However, considering the continuous increase in terminal operating costs and annual tariff adjustments implemented by terminal operators, a revision of Arkas Line THC tariffs have become necessary to maintain the sustainability of our service quality and operational standards.

The required increase in THC levels will be implemented in your upcoming contract periods and charged separately in addition to the applicable ocean freight rates.

The revised THC levels are as follows:

Equipment Type	Current THC (USD)	Revised THC (USD)
20’ Dry	500	600
40’ Dry	650	750
40’ Reefer	650	850

The revised THC levels will be applicable to all cargo received at the port terminal (Gate-In date) on/or after 1 January 2027, regardless of the vessel’s sailing date.

We sincerely appreciate your continued support and understanding. Should you require any further information or clarification regarding this adjustment, please do not hesitate to contact your local sales representative.
