

Seamless Trade in the Gulf: Flexible Inland Solutions

Due to the ongoing situation in the Middle East affecting logistics flows, Arkas Line is providing instant solutions to facilitate cargo movements across the Gulf region. These solutions provide additional flexibility through alternative handling options at selected gateway ports, available under both merchant and carrier haulage.

MERCHANT HAULAGE

We offer an alternative solution to your transportation processes with our merchant haulage service, ensuring the smooth and uninterrupted transit of your cargo to inland destinations.

- **Container Return:** Customers are encouraged to arrange timely pick-up at the port of discharge. For cross-border deliveries arranged by customers, empty containers must be returned to the original discharge port.
- **Container Deposit**
The following deposit levels will apply:
 - USD 3,000 (20')
 - USD 5,500 (40')

**Special equipment and Reefers are excluded for haulage.*

CARRIER HAULAGE

Arkas Line can arrange inland transport from the following gateway ports to final destinations within neighboring Gulf countries:

- Jeddah (Saudi Arabia)
- Aqaba (Jordan)

For additional details or booking requests, please contact the Arkas Line offices in your country.
